WEDDING DRESSES, BRIDESMAIDS AND PROM DRESSES

We are specialists in all kinds of dresses – but due to their nature, we cannot give a price without seeing the dress.

We need to have a look at how the dress is made up; how the layers fit and sit together.

For instance, to shorten a plain dress we'd normally turn up the bottom. But if you have a lace pattern at the bottom we couldn't do that! We'd need to shorten it from the top of that material layer. In doing that, we need to be sure that it won't affect how the dress sits on you.

That's why it can be a simple, quick job, or a lengthy, in depth job. So we need to see the dress to price it accordingly with how long it would take. Every dress is different!

That's also why you should only trust your dress to experts like us, with over 35 years of experience.
